### Notes

- **Valuation Request:** This column represents the total valuation of properties in each township.
- **Levy:** This column indicates the levy amounts for different services, such as fire and ambulance, for each township.
- **Total Township:** This column sums up the total levies across all services for each township.

### Calculations

To find the total levy for a township, you would add up the levies for all services. For example, the total levy for the **Castle Grove** township is calculated as follows:

**Castle Grove Township**

- **Total Township:** 0.48133

The total levy is calculated by adding up the levies for the different services, taking into account the valuation and the levy rate for each service.
